

BLIND SPOT CARD #1

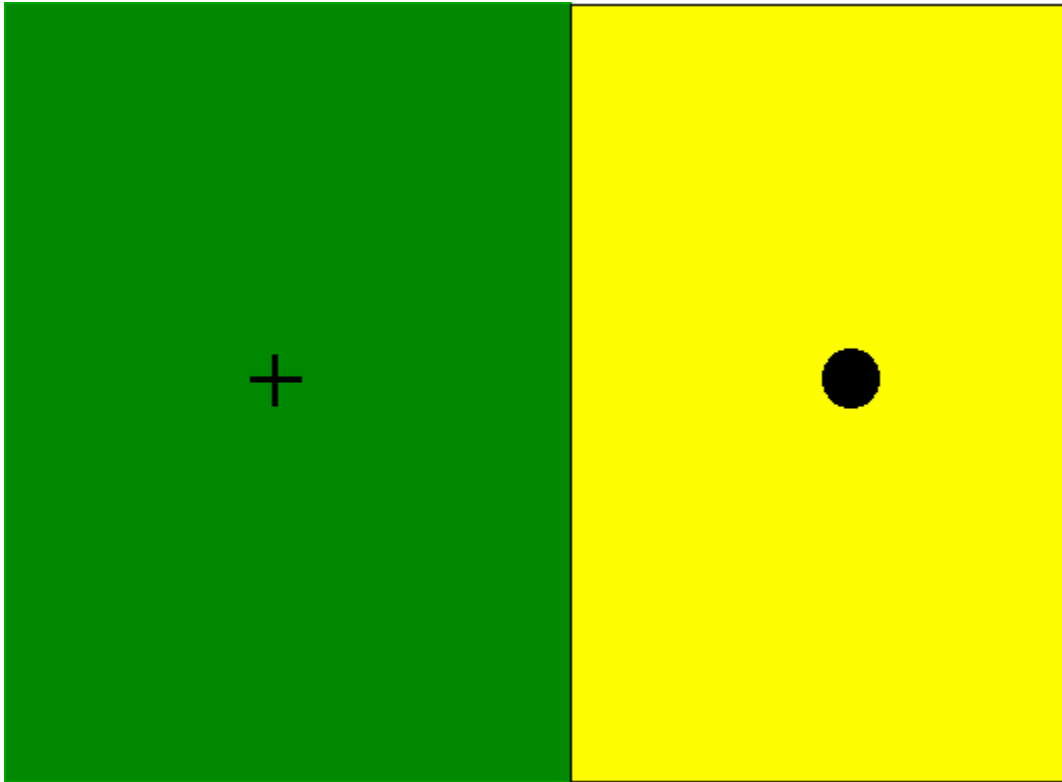

Make sure that you are familiar with the anatomical basis for the “blind spot.” If you are unsure ask?

BLIND SPOT CARD #2

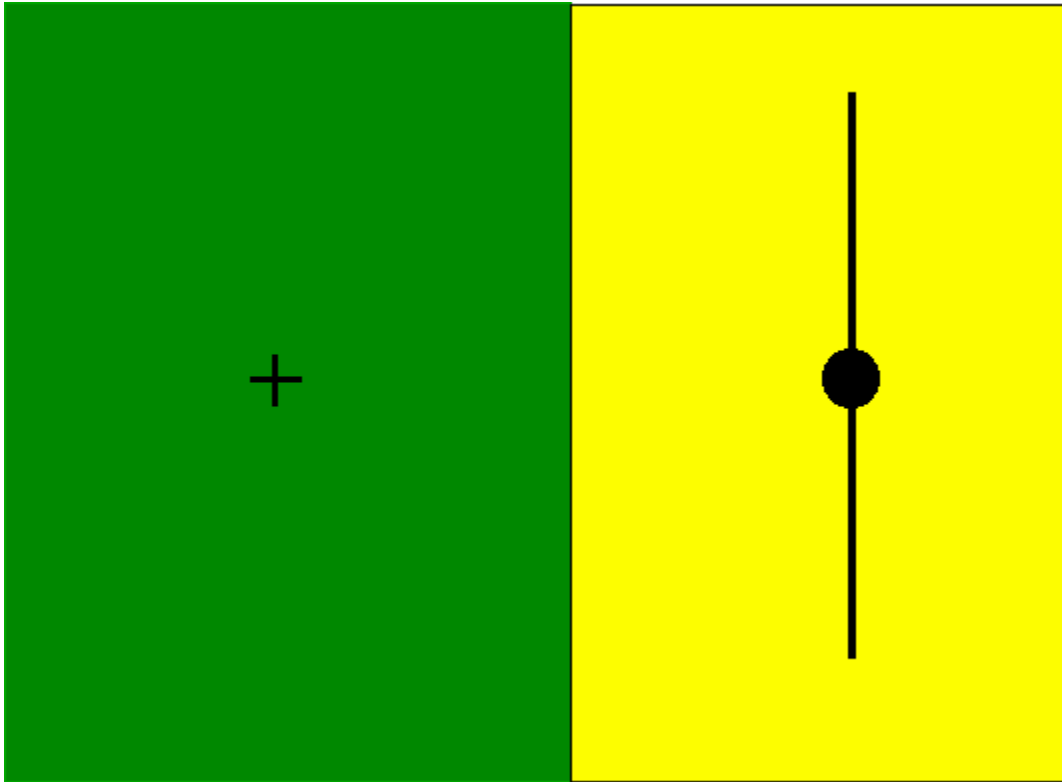

Close or cover your left eye. Stare at the cross with your right eye. Without actually looking at it notice in your peripheral vision the black spot.

Slowly move the card back and forth until the spot seems to disappear. What is going on?

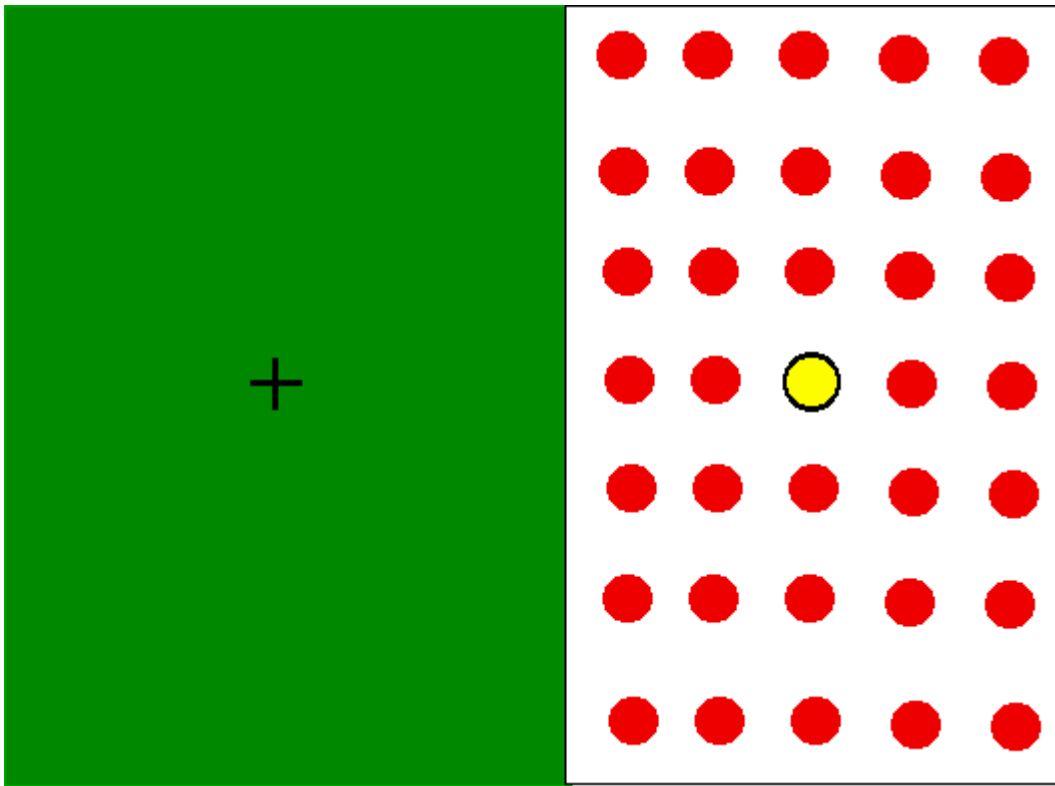

BLIND SPOT CARD #3

**Try again. This time with a colored background.
What do you notice? A spot? A hole? Something
else?**

BLIND SPOT CARD #4

What other tricks are in store? Try again. What do you notice this time?

BLIND SPOT CARD #5

One last variation... Again, what do you notice?

Is the mind oblivious to information it does not receive? Does it somehow fill in the missing piece? If so how? What might this tell us in general about the nature of sense perception?
